Summary

Provide a narrative summary of what is contained in this registration or how it differs from prior registrations. If this project contains documents for a preregistration, please note that here.

This is a pre-data collection registration of Kopf et al., 2013, "The Effect of Emotional Content on Brain Activation and the Late Positive Potential in a Word n-back Task" , described fully in writeup/replication-report.qmd, which is included in the attached files. All planned analyses and exclusions are reported. The planned sample size is 75 and the rationale and calculations for this sample size are given in the report.
